

Consolidated While Loop Practice Questions

- Q1.** Write a program that uses a while loop to calculate the sum of the first 50 natural numbers.
- Q2.** Write a program that uses a while loop to find the factorial of a given number. (num = 6)
- Q3.** Write a program using a while loop that prints numbers from 1 to 10.
- Q4.** Write a while loop to print the first 20 even numbers.
- Q5.** Write a program that uses a while loop to find the sum of the digits of a given number. (num = 54321)
- Q6.** Write a program that reverses a number using a while loop.
- Q7.** Create an infinite while loop that asks the user to enter a number. If the number is negative, the loop breaks; otherwise, it prints the square of the number.
- Q8.** Write a loop statement to print the series: 10,20,30,40,...300 and append them to a list.
- Q9.** Write a while loop statement to print the series: 105,98,91,... and append them to a list.
- Q10.** Write a program to print the first 10 natural numbers in reverse order using while loop.
- Q11.** Write a program to print the table of a number entered by the user.
- Q12.** Write a Python program that repeatedly asks the user to enter a number and prints 'Hello' for each input. The program should stop when the user enters a string (non-numeric value).
- Q13.** Write a Python program to print the following sequence of numbers in a single column:
1,2,3,4,5,6,7,8,9,10,9,8,7,6,5,4,3,2,1
- Q14.** Write a program that creates a list of names and prints the total number of names in the list using the len() function.
- Q15.** Write a program to enter numbers till the user wants and at the end display the sum of all the numbers entered.
- Q16.** Create an empty list. Continuously ask the user to enter their favorite movies until they type 'done'. Use the append() method to add each movie to the list.
- Q17.** Write a program to accept 10 numbers from the user and display the largest and smallest number.

Q18. Write a program to print all the characters in string 'PYTHON' using while loop.

Q19. Write a Python program to print only the odd numbers from the given list using while loop. list = [23,45,25,32,46,33,71,90]

Q20. Write a Python program to get the following output: 1---49, 2---48, ..., 49---1

Q21. Write a program that uses a while loop to check if a given string is a palindrome. (str = 'madam')

Q22. Write a program using a while loop to print all the factors of a number entered by the user.

Q23. Write a program to find the least common multiple (LCM) of two numbers using a while loop.

Q24. Write a program using a while loop to print a right-angled triangle of asterisks (*).

Q25. Create a program that uses a while loop to count the number of vowels in a string entered by the user.

Q26. Write a program that uses a while loop to find the average of positive numbers entered by the user until they enter a negative number.

Q27. Create a program that uses a while loop to count down from a user-specified number to zero, printing each number.

Q28. Create a program that uses a while loop to count the number of digits in a number entered by the user.

Q29. Create a program that asks the user for a string and a number, then uses a while loop to print the string the specified number of times.
